

Seshairam R

MERN Stack Developer

Full-Stack Developer specializing in the MERN stack with 1 year of hands-on experience in building responsive web applications and RESTful APIs. Skilled in both front-end and back-end development, with a focus on performance optimization and clean, maintainable code. Collaborated with cross-functional teams in agile environments to deliver scalable solutions

EXPERIENCE

MMC Enterprises, Chennai, TN

MERN Stack Developer

November 2024 - Present

- Worked at MMC Enterprises for 8 months, where I developed and deployed 10 full-stack web applications using MongoDB, Express.js, React.js, and Node.js, focusing on clean UI and scalable backend architecture.
- Integrated APIs, implemented user authentication (JWT), and ensured mobile and cross-browser compatibility for responsive user interfaces.
- Collaborated in Agile teams to fix bugs, build reusable components, and optimize performance across frontend and backend systems.

EVI Software Services Private Limited, Chennai, TN

React JS Developer

May 2024 - November 2024

- Worked at EVI Software Services Private Limited for 4 months, where I contributed to the development and deployment of multiple web applications using React.js, focusing on clean, responsive UI and efficient component architecture.
- Integrated RESTful APIs, implemented user authentication (JWT), and ensured cross-browser and mobile compatibility for seamless user experiences.
- Collaborated with the development team in Agile sprints to fix bugs, build reusable components, and enhance frontend performance.

PROJECT

OrderPls

- Built a personal full-stack restaurant management website using the MERN stack to enhance my skills through real-world functionality, focused on customer, employee, and owner roles.
- Customers can book seats in advance and pre-select dishes during the booking process for a smoother dining experience
- Restaurant owners can manage employee access and monitor performance, while employees (Server, Chef, Billing roles) handle orders, kitchen tasks, and billing operations efficiently.
